

# Wejden Chibeni

## ICT ENGINEERING STUDENT

### PROFESSIONAL SUMMARY

Motivated engineering student in Networks and Communication with CCNA1 and CCNA2 certifications. Proficient in React, Java, MATLAB, Eclipse, and Packet Tracer. Skilled in network configuration, troubleshooting, and scalable solution design. Experienced in front-end and back-end development, bridging software and network infrastructure. Quick learner with a passion for technology and innovation, eager to contribute to dynamic projects.

### EDUCATION

Networks and communication engineering | In progress

*National engineering school of Gabes*

Preparatory cycle in physics and chemistry | 2020-2022

*Preparatory Institute of Bizerte*

### PROFESSIONAL EXPERIENCE

#### Internship | 2023

##### Tunisie Telecom

- Conducted discovery and analysis of optical fiber systems.
- Gained understanding of Signal-to-Noise Ratio (SNR) and its impact on network performance.
- Explored the configuration and management of IP addresses in network setups.
- Enhanced technical skills in modern telecommunications infrastructures.
- Improved problem-solving abilities in professional network environments.

### PROJECTS

#### MERN stack Freelance project | In process

- Developed a dynamic freelance platform using the MERN stack (MongoDB, Express.js, React, Node.js) to connect freelancers and clients.
- Designed an intuitive front-end with React, including features such as project browsing, freelancer profiles, and a streamlined job application process.
- Built the back-end with Node.js and Express.js, handling API endpoints for user authentication, job postings, and messaging.
- Utilized MongoDB to securely store user data, job details, and communication logs.
- Implemented efficient state management, responsive design, and a modular code structure, providing a scalable solution for the freelance market.

#### Ecommerce project | 2023

- Developed a fully functional website using HTML, CSS, and Bootstrap for a responsive interface.
- Designed front-end features including product listings, search functionality, and a shopping cart with seamless navigation.
- Built back-end logic with PHP and MySQL, managed using XAMPP as the local server environment.
- Implemented user authentication for customer registration, login, and order tracking.
- Designed and configured a secure database to store product details and user accounts.
